I am a dedicated and results-driven Full-Stack Developer with **2.5+** years of experience in designing and developing scalable client-side and server-side applications. Skilled in building responsive user interfaces and developing secure, efficient REST APIs.

## 📁 Professional Experience

### React Developer, ItSkillarena Organisation

04/2022 – Present  
warangal, Telangana

- Developed a **role-based Training Institute Management System** (Admin, Super Admin, Faculty, Student) using **PHP & MySQL**, featuring secure authentication, user management, and streamlined workflows.
- Built and customized **WordPress websites** with Elementor and popular themes, enhancing UI/UX.
- Configured and integrated plugins: **Clone (page duplication)**.
- Conducted **manual testing on a live CakePHP application**, identifying bugs, validating workflows, and ensuring a smooth user experience.

**Vehicle Service Booking Platform** – Full-stack React application enabling customers to schedule services and select preferred technicians.

- Developed **role-based dashboards**:
- **Customer** → service scheduling & booking flow.
- **Technician** → manage assigned bookings & update statuses.
- **Admin** → monitor and track all bookings with detailed insights.
- Built **frontend (UI, role management, booking flow)** and **backend (APIs, authentication, database models)**
- Ensured smooth **client-server communication**, conducted manual testing, and resolved issues to maintain application reliability.
- **Developed and executed unit and integration tests** for service booking components using **Jest and React Testing Library**, ensuring 90%+ code coverage.
- **Tech Stack**: React.js, Redux, Node.js, Express.js, MySQL, JWT, Nodemailer, Multer, fast2sms, fcm-node, sanitize.

## 📁 Projects

### Mern Ecommerce Application

- Developed a Full-stack **MERN e-commerce** application with Redux for state management, supporting product CRUD operations, user authentication using JWT, and dynamic cart management.

**Tech Stack**: React.js, Node.js, MongoDB, Mongoose, Express.js, Redux Toolkit, JWT, axios, etc.

### Blogger Application

- Developed blog system with admin access to create/delete blogs, and user email subscriptions.
- App supports users to view blogs, subscribe with their user email ID.

**Tech Stack**: Next.js, Express.js, Tailwind CSS, Axios.

## 🧠 Skills

HTML | CSS | JavaScript | TypeScript | React.js | Next.js | Node.js | Express.js | Bootstrap | TailwindCSS | Redux | Git/GitHub | Axios | Postman | Thunder Client | Prisma | WordPress | PHP | NPM | MongoDB | Webpack | Babel | Docker | Socket.IO | MySQL | Azure DevOps (CI/CD).

## 🎓 Education

<b>ssc</b> , Cambridge Grammar High School, Warangal 7.7	2012
<b>Intermediate</b> , Sri Bhadrakali Junior College, Warangal 60%	2014
<b>B.Tech in Computer Science Engineering (CSE)</b> , Jayamukhi Institute of Technological Sciences 60%	2018
