WORK EXPERIENCE

WEB DEVELOPER

Itskillarena Organisation

04/2022 - Present

warangal, Telangana

RESPONSIBILITIES

- Developed SoftOffice, a full-featured Training Institute Management System using **PHP** and **MySQL**, with role-based access for Admin, Super Admin, Faculty, and Student.
- Experienced in building **WordPress** websites using popular themes like Elementor. Proficient in configuring websites and utilizing various plugins such as: Clone for duplicating pages, Duplicator for site migration, Google Analytics, SEO tools, sitemap generators, and menu navigation plugins.
- Performed manual testing on a live CakePHP application to identify bugs, validate user workflows, and report issues for timely resolution.
- Developed a Vehicle Service Booking Platform in **React** that allows customers to schedule services and choose preferred technicians. The application features a Technician Dashboard for managing assigned bookings and status updates, and an Admin Dashboard with modules for viewing booking details.
- I was responsible for developing the application's front end (user interface, user roles, booking flow) and backend (APIs, **Authentication**, **Database models**).
- Conducted manual testing and ensured smooth application flow across the client-server architecture, identifying and resolving issues effectively.
- **Technologies Used:** MySQL, Redux, Nodemailer, Jwt, Multer, fast2sms, fcm-node, sanitize.

EDUCATION

SSC

Cambridge Grammar High School, Warangal

2012

Gpa: 7.7

Intermediate

Sri Bhadrakali Junior College, Warangal

2014

Aggregate: 60

B.Tech in Computer Science Engineering (CSE)

Jayamukhi Institute of Technological Sciences

2018

PERSONAL PROJECTS

Mern-Stack-Project

- **Developed a full-stack MERN e-commerce application** with Redux for state management, supporting product CRUD operations, user authentication using JWT, and dynamic cart management.
- **Technologies Used:** React.js, Node.js, MongoDB, Mongoose, Express.js, Redux Toolkit, JWT, axios, etc.

Next.js Project

- **Implemented a full-stack blog application using the MERN stack** with role-based access for Admin and User. Users can browse categorized blogs and subscribe to newsletters. Admins can manage blog content and subscriber data via an Admin dashboard.
- **Technologies Used:** Next, MongoDB, Mongoose, axios.
